CONTROL ROOM

**RE: 300: BR: S003154**

Dear Sir:

Enclosed is the information you requested in your letter sent to me dated February 25, 2009, with regard to the POD's and POU's used at Bailey Creek Meadows Ranch (owners Pamela E. Palomino/Debra Oppezzo) in Viola, California. Our family has used the identified POD's and POU's for over 50 years utilizing the Pre-1914 riparian water rights to primarily maintain meadow grass for cattle grazing. I used [www.Trails.com](http://www.Trails.com) as the map provider to pinpoint the areas of diversion and use. Water usage varies from year to year due to drought and flood conditions. This is a gravity flow-return to creek system.

If anything else is needed please feel free to contact me via email, snail mail, or by phone as stated below.

Sincerely,

  
Pamela E. Palomino

[randypalomino@sbcglobal.net](mailto:randypalomino@sbcglobal.net)

STATEMENT OF WATER DIVERSION AND USE #1

(This is not a Water Right)

This Statement should be typewritten or legibly written in ink and submitted to the address above.  
A separate statement should be filed for each point of diversion. A duplicate copy will be returned for your file.

- A. Name of person diverting water Pamela Palomino, Debra Oppizzo  
Address 3076 Majestic Oak Circle, Cottonwood, CA 96022  
Telephone: (530) 347-4868
- B. Water is used under: Riparian claim; \_\_\_\_\_ Pre-1914 right; X Other (explain) \_\_\_\_\_
- C. Name of the body of water at the point of diversion  
Bailey Creek  
Tributary to Battle Creek, Sacramento River Basin
- D. Point of diversion is located within Shasta County on Assessors Parcel # 702-160-01 be  
within the 5 1/2 of Section 29 and N 1/2 Section 32 of Township 31N Range 3E MD B&M.  
Name of works Private Irrigation; Domestic Water Source
- E. Do you own the land at the point of diversion? Yes \_\_\_\_\_ NO X The name and address of the owner of the land is:  
Carolynne Lee, 7898 Tucker Lane, Redding, CA  
Dennis Dierksen, 3112 Shane Ln., Cottonwood, CA
- F. Capacity of diversion works 12 cfs (cfs, gpm, or gpd) Capacity of storage tanks or reservoir n/a (gallons or acre-ft)  
Type of diversion facility: Gravity X Pump \_\_\_\_\_  
Method of measurement: Weir X Flume \_\_\_\_\_ Electric Meter \_\_\_\_\_ Estimate \_\_\_\_\_
- G. Enter the amount (or approximate amount) of water used each month.  
Amounts below are shown in: Gallons \_\_\_\_\_ Acre-feet \_\_\_\_\_ Other \_\_\_\_\_
- | Year | Jan | Feb | Mar | Apr | May | June | July | Aug | Sept | Oct | Nov | Dec | Total Annual |
|------|-----|-----|-----|-----|-----|------|------|-----|------|-----|-----|-----|--------------|
| 08   | X   | X   | X   | X   | X   | X    | X    | X   | X    | X   | X   | X   | 187.5        |
- H. Annual water use in recent years: Maximum \_\_\_\_\_ (gallons or acre-feet) Minimum 187.5 (gallons or acre-feet)  
Year of first use (nearly as known) Pre-1914
- I. Purpose of use: What is the water being used for: (example, number of acres and type of crop irrigated, average number of persons served, number of stock watered, etc.) Year-round domestic and summer irrigation.  
approx 37.5 acres of irrigated pasture for livestock grazing.  
Return flow to creek.
- J. General description or location of place of use (example: 40 acres of pasture located 3 miles from Happyville on Alpha Road) \_\_\_\_\_  
75-80 acres of pasture located 1.8 miles from Viola, CA  
off of Brokeoff Meadows Road.
- K. Map: Please locate the point of diversion and place of use on a print of a USGS quad map, or make a sketch on the section grid provided the reverse side of this form. The sketch should identify the section lines, prominent local landmarks and roads, your point of diversion, and your place of use (your house, acreage irrigated, etc.).

L. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Describe any water conservation efforts you may have started: \_\_\_\_\_

2. Water quality and wastewater reclamation

a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree that unreasonably affects such water for other beneficial uses? YES \_\_\_ NO \_\_\_

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California: riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to 1) store water for later use 2) divert water which originates in a different watershed 3) divert water released from storage, or 4) divert return flows from groundwater use.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement: (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Further water right information and additional copies of this form can be obtained at [www.waterrights.ca.gov](http://www.waterrights.ca.gov).

## MAP DEFICIENCY IN STATEMENT OF WATER DIVERSION AND USE FOR DIVERSION FROM BAILEY CREEK TRIBUTARY TO BATTLE CREEK IN SHASTA COUNTY

The State Water Resources Control Board, Division of Water Rights (Division), received your Statement of Water Diversion and Use (Statement) on May 28, 2008. Division staff evaluated your Statement for processing of a [riparian, pre-1914] claim and found the information deficient with respect to Items D and K on the form. Item D requires identification of the location of your Point(s) of Diversion (POD). Statement 003154 for a diversion from Bailey Creek (APN# 702-160-01) is currently on file with the Division. A new Statement needs to be filed for each individual claimed diversion. Item K requires that the Point(s) of Diversion (POD) and the Place(s) of Use (POU) be identified on a map. The information you provided was inadequate for identification of your claim on U.S. Geological Survey (USGS) topographic maps used by the Division. You will need to pinpoint your POD and outline your POU on a USGS topographic map to allow proper processing of your Statement. USGS topographic maps are available through a mapping service, at <http://www.topozone.com>, and at the Division. Please note that each Statement should be accompanied by its own topographic map and a county Assessor's Parcel Number map will not suffice for this purpose. Submit a copy of this letter along with the map depicting the POD and POU to the Division. A copy of the map should be retained for your records. If the Division does not receive the requested information within 60 days from the date of this letter, your Statement will be considered incomplete.

A Supplemental Statement of Water Diversion and Use (Supplemental Statement) will be mailed to you every three years, and must be filed with the Division prior to July 1 of that year. There is no fee for filing a Supplemental Statement. The submittal of a Supplemental Statement is a record of your water use. It is used by the Division to verify existing data and to notify you of water right matters related to your [riparian, pre-1914] claim.

If you have questions or concerns regarding this matter, please contact me at (916) 341-5376 or at [brigby@waterboards.ca.gov](mailto:brigby@waterboards.ca.gov).

Sincerely,

Bill Rigby

D. **Purpose of Use** - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 75 acres; Stockwatering 55 head; Domestic Water supply for residents  
Other (specify)

E. **Changes in Method of Diversion** - Describe any changes in your project since your previous statement was filed.  
(New pump, enlarged diversion dam, location of diversion, etc.) No changes

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES ☐ NO ☐

Describe any water conservation efforts you have initiated:

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:

Year (AF/MG) Year (AF/MG) Year (AF/MG)

Reduction in consumptive use:

Year (AF/MG) Year (AF/MG) Year (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES ☐ NO ☐ WRMS

JUN 2 2005

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree, which unreasonably affects such water for other beneficial uses? YES \_\_\_\_ NO \_\_\_\_.
- b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:

Year \_\_\_\_ (AF/MG) Year \_\_\_\_ (AF/MG) Year \_\_\_\_ (AF/MG)

State the type of substitute water supply: \_\_\_\_\_

Amount of substitute water supply used:

Year \_\_\_\_ (AF/MG) Year \_\_\_\_ (AF/MG) Year \_\_\_\_ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES \_\_\_\_ NO \_\_\_\_.

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES \_\_\_\_ NO \_\_\_\_.
- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:

Year \_\_\_\_ (AF/MG) Year \_\_\_\_ (AF/MG) Year \_\_\_\_ (AF/MG)

I have data to support the above surface water use reductions due to the use of groundwater. YES \_\_\_\_ NO \_\_\_\_.

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

STATE WATER RIGHTS BOARD

STATEMENT OF WATER DIVERSION AND USE

S 3154

This statement should be typewritten or legibly written in ink.

- A. Name of person diverting water Earl Bibbens  
Address \_\_\_\_\_
- B. Name of body of water at point of diversion Bailey Creek  
Tributary to Battle Creek - Sacramento River Basin  
S $\frac{1}{2}$  of Section 29 and N $\frac{1}{2}$  of Section 32
- C. Place of diversion Shasta 1/4 Section Township 31N Range 3E MD 82M  
County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

- D. Name of works Private Irrigation & Domestic Water Source

- E. Capacity of diversion works 12 cfs  
Capacity of storage reservoir No storage  
State quantity of water used each month in gallons or acre-feet
- cu-ft per second  
gallons per minute  
gallons  
acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
------	------	------	------	------	-----	------	------	------	-------	------	------	------	--------------

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. Year-round domestic and summer irrigation - 50 persons - 75 head cattle - 75 acres irrigated meadow

Maximum annual water use in recent years 375 acre feet per annum

Minimum annual water use in recent years ---

Type of diversion facility: gravity ☒ , pump

Method of measurement: weir ☒ , flume , electric power meter , water meter , estimate

- F. Purpose of use (what water is being used for) Year-round domestic and summer irrigation

- G. General description or location of place of use (use sketch of section grid on reverse side if you desire)

- H. Year of first use as nearly as known

- I. Name of person filing statement Alan Hill  
Position Civil Engineer Organization Clair A. Hill & Associates  
Address P. O. Box 2088, Redding, California 96001

I certify that the foregoing statement are true and correct to the best of my knowledge and belief.

Date signed Aug 6, 1967

Signature Earl D. Bibbens
